DETAILED ACTION

1. The response filed November 4, 2008 has been received, entered and carefully considered. The response affects the instant application accordingly:
 - (A) Comments regarding Office Action have been provided drawn to:
 - (I) 103(a) rejection, which is maintained for the reasons of record.
2. Claims 1-45 are pending in the case; Claims 29-45 are withdrawn from consideration as being directed to non-elected inventions.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

4. Claims 1-28 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Jonsson et al (US Patent No. 6,967,037) in view of Guiseley (US Patent No. 4,443,486).

Response to Arguments

5. Applicant's arguments filed November 4, 2008 have been fully considered but they are not persuasive. Applicants argue against the rejection on the ground that the Guiseley patent does not disclose or suggest a gel comprising the claimed carrageenan. This argument is not persuasive because the Jonsson et al patent discloses high solids carrageenan gels that meet the requirement of the carrageenan of the instant claims, including molecular weight and gelling temperature. The solids content of the carrageenan containing composition disclosed in the Jonsson et al patent suggests viscosity values that falls within the carrageenan viscosity recited in the instant claims since the Jonsson et al patent discloses soluble solids in the range of about 50% to about 90% in the gel compositions thereof (see abstract), which meet the instantly claimed range of the instant gel containing carrageenan having a solids content of at least 40%. The Guiseley patent is mainly cited to show that the viscosity values of the carrageenan recited in the instant claims are known in the art.

In response to Applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See *In re Fine*, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and *In re Jones*, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, as indicated in last Office Action, it would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate into the carrageenan containing gelled food composition of the Jonsson et al patent a carrageenan having a viscosity of 5 to 10 mPa.s in view of the recognition in the art, as evidenced by the Guiseley patent, that carrageenan having such viscosity are effective in stabilizing food products.

Accordingly, the rejection of Claims 1-28 under 35 U.S.C. 103(a) as being unpatentable over Jonsson et al patent in view of Guiseley patent is maintained for the reasons of record.

Reply to Final Must Include Cancellation of Claims Non-elected with Traverse

6. This application contains Claims 29-45 drawn to an invention nonelected with traverse in the reply filed on March 10, 2008. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Summary

7. Claims 1-28 are rejected; Claims 29-45 are withdrawn from consideration.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
